Albury Wodonga Health

Albury & Wodonga Campuses
Affiliated with University of New South Wales

About Albury Wodonga Health

Albury Wodonga Health (AWH) is the regional referral hospital for North East Victoria and Southern New South Wales, comprising 280 beds over two acute sites 10 kilometres apart. AWH provides a broad range of clinical services with local resident specialists supported by Accredited Registrars in all specialties.

Services are provided over two campuses. Our Health Service includes a 9 bed Intensive Care Unit, 6 Operating Theatres and two Emergency Departments with over 60,000 attendances per annum. Inpatient services include general medicine, ICU, paediatrics, obstetrics & gynaecology, internal medicine, general surgery, orthopaedics, urology, ENT, ophthalmology, psychiatry, medical oncology, geriatrics and rehabilitation. There is a large group of Senior Medical Staff supporting these services, providing both elective and emergency care. The specialists are supported by a full range of accredited registrar positions in general medicine, paediatrics, general surgery, orthopaedics, anaesthetics, urology, and medical oncology. On site pathology services and Imaging services (including CT and MRI) are available 24 hours.

A key feature of our hospital is the active education program for HMOs and Registrars, including Clinical Review meetings, in addition to the formal intern HMO education program.

General Information

Conditions of Employment

Conditions of employment are based on the Terms and Conditions of the current AMA Doctors in Training Agreement.

Post Graduate Medical Education

Alfred Health is committed to postgraduate medical education.

It is seen as an investment in the future for both the junior medical staff and the hospital.

Postgraduate medical education and training at Alfred Health is an integral part of the hospital's operations and philosophy. It is recognised that there is an inter dependence between the provision of high quality healthcare and the education of health professionals.

The hospital supports postgraduate medical education by providing a wide range of postgraduate educational activities together with a strong commitment by the senior medical staff, both full time and visiting in the provision of appropriate clinical experience and education support. Senior medical staff are appointed not only for their skills in patient care but also for their ability to teach and foster an environment of enquiry and learning.

The role of the Medical Education Manager (MEM) is to assist in facilitating educational training programs with particular support to the continuing of education to interns and PGY2's. Education programs for PGY1 and PGY2s are mapped to the Australian Curriculum Framework. The MEM works closely with the Director of Clinical Training, Supervisor of Intern Training, Supervisor of Physician Training, and Supervisor of SET training programs in the development and implementation of relevant educational programs. Our Supervisors are not only dedicated to supporting our junior medical staff in their chosen career pathways but more importantly take a keen interest in their overall professional development.

In developing and implementing educational programs the Postgraduate Medical Education Unit seeks feedback from junior medical staff to ensure programs are tailored to fit your needs.

Some of the current programs are:

- Mentoring Program
- Intern Orientation Program
- Junior Medical Staff After Hours Program
- HMO & Registrar Orientation Program
- Junior Medical Staff Clinical Anatomy Program
- Trauma Orientation Program
- Cardiothoracic Orientation Program
- Neurosurgery Orientation Program
- Medical Emergency Program and Surgical Emergency Program
- Weekly intern education program
- Career Information Evening
- Basic Sciences Program
- HMO Education Program
- Physician and Surgical trainees exam preparation

- Cardiac Simulation Program
- Paediatric Skills & Simulation Training Program
- Suturing Master Class
- Anastomic Workshop
- Professional Development Program
- Physician Trainees
- SET Interview Preparation Program

Rotation Hospitals

- Bethlehem Hospital

Austin Health

Austin Hospital, Heidleberg Repatritation Hospital, and Royal Tablot Hospital
Affiliated with the University of Melbourne

About Austin Health

Austin Health is world renowned for its research and specialist work in many fields of medicine and provides state wide services in liver transplantation, spinal cord injuries, respiratory support services, toxicology and paediatric mental health. We are also the centre for veteran mental health services.

Austin Health incorporates the Austin Hospital, Heidelberg Repatriation Hospital (HRH) and the Royal Talbot Rehabilitation Centre (RTRC) and is affiliated with eight universities, specifically the University of Melbourne, Medical School for undergraduate and postgraduate medical education.

In addition, Austin Health is the largest training provider for specialist physicians and surgeons; and the incorporation of the Austin Hospital, the Mercy Hospital for Women and Warringal Private Hospital also makes the precinct the largest training facility in Victoria.

Contact Details

Address: 145 Studley Road, Heidelberg Vic 3084

Ph: (03) 9496 5000 (Austin Hospital Switchboard)

(03) 9496 6813 (Medical Workforce Unit)

Fax: (03) 9496 3184 (Medical Workforce Unit)

Website: www.austin.org.au & www.austindoctors.org.au

Deputy Directory, Medical Workforce Unit: Ms Sarah McConchie

Chief Medical Officer: Dr John Ferguson

Supervisor/Director of Intern Training: Dr Natasha Holmes

Medical Education Officer: Ms Pauline Dib, Clinical Education Unit

Services Available

Austin Health operates over 980 beds across acute, sub-acute and mental health services, providing a comprehensive range of Emergency, Medical, Surgical and Specialist health services to the north-eastern communities of Melbourne and state wide.

Austin Hospital

The Austin Hospital features:

- Over 560 acute beds
- A 20 bed Intensive Care Unit
- A 42 cubicle adult emergency department containing a specialist six-bed unit for children
- A purpose-built, 26-bed high-tech spinal unit to serve all of Victoria and Tasmania
- An expanded mental health precinct with 55 adult mental health beds
- A state of the art facility for world class cancer treatment with research and a focus on wellness in the Olivia Newton-John Cancer and Wellness Centre
- A unique teaching, training and research precinct including a teaching space and laboratory on each level of the Austin Hospital Tower.

Austin Hospital is also home to a number of state-wide services, namely the:

- Victorian Spinal Cord Service
- Victorian Respiratory Support Services
- Victorian Liver Transplant Unit
- Acquired Brain Injury Unit
- Child Mental Health Inpatient Unit
- Austin Toxicology Service
- Victorian Poisons Information Centre

Heidelberg Repatriation Hospital

The Heidelberg Repatriation Hospital has a proud history of caring for veterans and war widows. Originally built in 1941, the hospital became part of Austin Health in 1995.

Today the Heidelberg Repatriation Hospital continues to treat veterans and war widows and the wider community with day surgery, palliative care, mental health services, aged care, and a range of outpatient services.

With the opening of The Surgery Centre in 2013 we now have eight operating theatre suites at the Heidelberg Repatriation Hospital; it now fills a substantial elective surgery role.

Royal Talbot Rehabilitation Hospital

The Royal Talbot Rehabilitation Centre is a specialist provider of intensive rehabilitation programs, providing a comprehensive and coordinated range of medical, nursing, therapy and support services to people with a wide range of disabilities.

Areas of specialty include acquired brain injury rehabilitation, amputee rehabilitation, neurological rehabilitation, spinal cord injury rehabilitation, orthopaedic rehabilitation and orthotic and prosthetic services.

Services are provided on an inpatient and day patient basis.

Austin LifeSciences

Austin LifeSciences brings together internationally-renowned research institutes and over 800 Austin Health researchers, with a focus on cancer, diabetes, respiratory disease, liver disease, heart disease, stroke, epilepsy and psychiatry.

The Austin Health research institutions include:

- The Florey Neuroscience Institutes
- Ludwig Institute for Cancer Research
- Institute for Breathing and Sleep
- Austin Medical Research Foundation
- Parent-Infant Research Institute
- Spinal Research Institute

Specialist Services Include:

- Cardiology and Cardiac Surgery
- Spinal injuries
- Neurosurgery
- Rehabilitation services
- Cancer
- Neurological disorders including epilepsy and stroke
- Liver and renal transplant
- Aged care
- Respiratory disease (including asbestosis and mesothelioma)
- Extensive general medicine and surgery
- High level diagnostic services across all modalities
- Vascular surgery
- Orthopaedic surgery
- Urology
- Psychiatry – including mood disorders unit for mothers and babies, an eating disorder unit and a child and adolescent mental health unit.

General Information

Conditions of Employment

Conditions are as per the Victorian Public Health Sector (AMA Victoria) - Doctors in Training - (Single Interest Employers) Enterprise Agreement 2013.

Post Graduate Medical Education

There is a dedicated Clinical Education Unit at Austin Health which provide support and innovative training opportunities in a safe learning environment for doctors in training. These activities include orientation, mentoring, vocational guidance, feedback, assesment and professional development activities.

Led by the Director, Clinical Education Unit and Clinical Lead, Medical education, the CEU is well supported by both clinical and non-clinical staff including a Director of Clinical Training, Supervisor of Intern Training, Surgical Supervisor of Training, Directors of Physician Training, GP Liaison Officer, Medical Clinical Educator, Medical Education Officer and Projects Coordinators.

Orientation

There is a 4-day comprehensive orientation program for interns at Austin health that includes a full day of shadowing with the former intern and an interactive clinical skills workshop.

At Austin Health, we provide an Intern Liaison Officer for the first week of the new intern year; this role supports the interns after hours and over week end duties to ensure a supported and safe environment for all interns.

For new HMOs and Registrars there is a half-day orientation at both hospitals that delivers key organisational information on rostering, payroll, credentialing activities and education and support programs. Attendance at this session is required for all new DiT's.

Unit Handbooks

Comprehensive handbooks are available for each unit. These are designed to support 'on the job' orientation provided by the units and to assist with the overall transition from one unit to another.

Mid term Feedback, Assessment and Rotation Evaluation

Mid term and end of term feedback for interns is provided both verbally and in writing by the Registrar and/or the Unit Consultant in line with the Performance Assessment and Feedback Guidelines for Junior Doctors. In addition to receiving feedback, all interns and DiT's are provided the opportunity to provide feedback about their experience in the unit. This information is de-identified for feedback to Heads of Unit annually.

Rosters

Yearly rotations are available and distributed prior to commencement. These are set after careful consideration of training requirements, past rotations, special interests and requests. Whilst every effort is made to accommodate requests, this is not always possible.

Formal Training Programs

Austin Health has in place formal training programs for interns, HMO2's and HMO3's. These programs provide a structured and supportive environment for learning, and are evidence of the importance placed on continuing education by Austin Health.

Surgical Training

Austin Health was the first hospital in Melbourne to run a series of 'hands on" weekend workshops on Basic Surgical Skills for interns and basic and advanced trainees. The skills taught include open laparoscopy techniques, intra corporal and extra corporal knot tying and hand sewn end-to-end anastomosis. The workshops provide the opportunity for immediate feedback from experienced consultants. We provided training in interview techniques and have a high success rate of entry into Surgical Training Programs.

General Training

Austin Health has a pro-active training program that is facilitated by our GP Liaison Officer and staff from the Clinical Education Unit. Included in this program is a series of workshop activities that take place throughout the year.

Physician Training

The Central North West Basic Physician Training Consortium incorporates Austin Health, Northern Health, Bendigo Health, and Wimmera Healthcare Group (Horsham Hospital).

The Consortium is renowned for its physician-training program and has an excellent pass rate in the FRACP Written and Clinical Exams. The Consortium runs a mock written exam in early February which emulates true exam conditions. A feedback session gives the opportunity for trainees to discuss the questions and answers. Directors of Physician Training and Senior Medical Registrars at both Austin and Northern organise an extensive series of topic tutorials, long and short case clinical tutorials and arrange Saturday morning practice clinical exams to adequately prepare trainees for the clinical exam. The practice clinical exams are held at Austin Health, Northern Health and Bendio Health. A Professional Development program is available for Physician Trainees through the Consortium and covers topics such as Feedback - Teaching styles - Mentoring - Managing Conflict - Team building skills.

Please refer to the PMCV website for matching information in relation to the BPT2 and BPT3+ matches. (http://computermatching.pmcv.com.au)

Advanced Cardiac Life Support Course

Austin Health Critical Care Staff run various courses throughout the year to improve doctors in training confidence with handling cardiac arrests. Annual Basic Life Support (BLS) credentialing is mandatory.

Career Counselling

There are many opportunities throughout the year to get advice from the staff of the Clinical Education Unit and the Medical Workforce Unit on your career prospects.

Mentoring Program

Austin Health has a well established mentoring program available for junior doctors to access should they wish to do so. Both clinical and non-clinical mentors are available.

Elizabeth Austin Registrar

The Elizabeth Austin Registrar is another resource for junior medical staff at Austin health. The Elizabeth Austin Registrar is available to provide support and advice relating to clinical situations, and also participates in delivery of education sessions for staff.

International Medical Graduate (IMG)

Austin Health has a supportive and formalised training program for International Medical Graduates. Fortnightly sessions are conducted covering a broad range of clinical and non-clinical topics. A dedicated Medical Clinical Educator supports the IMG training program.

Bairnsdale Regional Health Service

About Bairnsdale Regional Health Service

In 2016 Bairnsdale Regional Health Service will facilitate the placement of 2 interns in the region for the full year of internship. These placements combine with three East Gippsland Community based and five Eastern Health rotational placements comprising the intern workforce. These rural pathway placements represent an opportunity to experience rural medicine, working alongside general practitioners, visiting and staff specialists within a community focused hospital. In Bairnsdale, general practitioners provide all Anaesthetic and Obstetric services and admit medical patients under their care. In addition these specialist general practitioners provide emergency care for high acuity presentations to the emergency department.

Bairnsdale Regional Health Service provides services including comprehensive primary care, acute care, aged care, community and home based services to a growing population of 40,000 people across a land mass of 21,000 square kilometers.

In 2013-2014 there were 14,045 admissions to the hospital. Approximately 25% of admissions are emergency admissions and 65% were admitted for same day treatment. There were 19,262 attendances at the Emergency Department.

Contact Details

Website: www.brhs.com.au

Contact: Joanne Kilty, Medical Workforce & Education Manager

Ph: 03 5150 3356

E: joanne.kilty@brhs.com.au or mwu@brhs.com.au

Intern Program Structure

Your rotations will comprise:

- General Surgery;
- General Medicine;
- Emergency Medicine; and
- Rehabilitation & Geriatric Evaluation

The intern year will involve at least 48 weeks of supervised clinical experience and comprising the core competencies.

Education Program

The education program is a key component for this intern placement, and one that integrates education across multiple sites. The program will ensure that:

• Each intern has the opportunity to attend a full year of educational activities that are based on the Australian Curriculum Framework for Junior Doctors;

• Attendance is marked and evaluation of the educational sessions occurs;

• Duplication is avoided wherever possible, including through use of recording and videoconferencing between sites;

• The educational needs of the rotating interns are maintained;

• The program has a strong skills-based component, working in association with the Monash Rural Clinical School, and all interns are released from their clinical duties to attend these workshops;

• Where appropriate, some educational activities will be multidisciplinary and/or vertically integrated either with medical students or GPs

• Each intern will have a required number of presentations at Grand Rounds throughout the year.

One-on-one teaching on the run moments and supervisory review are in addition to this program.

Orientation

You will be orientated to the BRHS intern program alongside the East Gippsland Community based interns as group at a face-to-face week-long orientation that covers all aspects of working in a rural health service.

HMO Program Structure

There are 2 PGY 2 positions that will rotate after 26 weeks between General Medicine and Emergency Medicine.

Emergency

Emergency Department HMO2s are expected to assess and formulate management plans for all patients presenting to the Department, although Categories 1 and 2 patients would be managed under supervision and with the support of the Senior Medical Officers, General Physician, Visiting Medical Officers and/or Hospital Medical Officers 3+/Unaccredited Registrars. On average around 20% of presentations to the emergency department at Bairnsdale Regional Health Service are paediatric, this has in the past been recognised by the General Practice colleges for terms of 6 months considered a 3 months paediatric experience equivalent.

From time to time, the HMO2 may be required to cover ward work after hours.

Emergency Department HMO2s will be rostered on for 38 hours per week in a rotating roster covering morning and afternoon/evening shifts seven days per week. HMO2s and Interns are not rostered to work overnight. Senior staff are supportive of Intern and HMO2 attendance at educational opportunities, as such HMO2's are encouraged to attend

Emergency Department HMO2s are also expected to provide medical care to patients admitted to the adjacent Short Stay Unit.

General Medicine

The General Medical HMO2 will be rostered on for 38 hours per week in a rotating roster covering morning and afternoon/evening shifts seven days per week. During the morning, the General Medical HMO2 is expected to attend ward rounds with the GP VMOs requiring a complex task of prioritisation with multiple GP VMOs consulting at any one time. Hence the General Medical HMO2 and Medical Intern will review the morning round, assessing and formulating management plans for all admitted medical patients in consultation with the GP VMOs, staff and 2 full time General Physicians. Where patients require the involvement of a specialist, the HMO2 will liaise with the appropriate specialist, refer for further care and in some circumstances facilitate transfer to an appropriate care facility. Together with the Medical Interns the General Medical HMO2 will receive direct admissions from GP clinics and general admissions from the emergency department.

All Medical Ward discharge documentation will be completed by both the General Medical HMO2 and Intern.

When not attending to the above, the General Medical HMO2 will be expected to participate in the education activities available on-site or at Monash University.

Bairnsdale Regional Health Service: HMO Applications

All HMO applicants must also register with the PMCV Computer Matching Service before **29 July 2015**

Hospital applications open 01 June 2015

Ballarat Health

Ballarat Base Hospital, Queen Elizabeth Centre & Grampians Psychiatric Services

About Ballarat Health

Ballarat Health Services is the major provider of hospital and healthcare services in Western Victoria. Ballarat Health Services was formed in 1997 through the merger of the Base Hospital (acute medical, surgical, obstetric, paediatric, critical care and emergency services), Queen Elizabeth Centre (aged care, rehabilitation and palliative care) and Grampians Psychiatric Services (acute, aged and community psychiatric services).

Ballarat Health Services provides services to a regional population of 200,000 people.

Located in the historic provincial city of Ballarat, just 80 minutes drive from Melbourne; Ballarat Health Services provides excellent hospital training and experience, superb lifestyle and exciting career options.

Contact Details

Address: Drummond Street, Ballarat, Vic 3550

Ph: (03) 5320 4000 (Ballarat Hospital Switchboard)

(03) 5320 6858 (Medical Administration)

Fax: (03) 5320 4554 (Medical Administration)

Website: www.bhs.org.au

Email: internrecruitment@bhs.org.au

HMO Manager: Ms Victoria Fara

Cheif Medical Officer: A/Prof Philip Reasbeck

Supervisor of Intern Training/Director of Clinical Training: Dr Jaycen Cruickshank

Medical Education Officer: Ms Michelle Bodey

Services Available

In-patient Services

General Information

Conditions of Employment

Conditions of employment are based on the Terms and Conditions of the Victorian Public Health Sector (AMA Victoria) - Doctors in Training (Single Interest Employers) Enterprise Agreement 2013.

Facilities and Amenities

Amenities:

RMOs room, RMOs Society, medical library, cafeteria, lockers, gymnasium

Graduate Education:

Intern and HMO Training

Ballarat Health Services has a Medical Education Officer (MEO), a Supervisor of Intern Training (SIT), Director of Clinical Training (DCT) and a Medical Clinical Educator (MCE).

Interns receive an intensive orientation program. Weekly intern training takes place under the auspices of the SIT and guided by the Australian Curriculum Framework for Junior Doctors. All interns receive BLS training early in the intern year.

HMO Training is a combination of formal lectures (including a weekly Grand Round presentation), bedside teaching, unit specific teaching (M&M meetings, pathology and radiology meetings, and multidisciplinary meetings) and on-line resources and guides.

Ballarat Health Services has a large medical library with study space, computers and educational resources. Self-directed learning is encouraged and facilitated.

Undergraduate:

The Ballarat Rural Clinical School, under the auspices of Melbourne University Medical School commenced full operation in July 2004, with up to 16 students being based at Ballarat.

In 2010 the first group of 18 students from the Deakin Medical School commenced their clinical training at Ballarat Health Services. A new education centre has been developed within Ballarat Health Services for the third and fourth year students.

Notre Dame University students are now attending St John of God Hospital for their final year of studies.

The Ballarat Health Services library has under-gone significant expansion in anticipation of the increased medical student numbers.

Barwon Health

University Hospital Geelong
Affliliated with Deakin University

About Barwon Health

Barwon Health is the largest Regional Health Service provider in Victoria. It offers an extensive range of general and specialist hospital, rehabilitation, residential and community services to over 93% of the Geelong community and an increasing number of residents across the Barwon South-Western region. Barwon Health has a total of 1,000 beds, a budget in excess of $500 million and a workforce of 6,500.

Barwon Health Geelong Hospital is a 406-bed general medical and surgical teaching hospital affiliated with The Deakin University Medical School with obstetric, paediatric and psychiatric beds. There are Professorial Departments of Medicine, Surgery and Psychiatry. The Hospital positions are accredited for basic and many advanced training programs.

Barwon was awarded Regional Hospital of the Year 2011, 2013.

Contact Details

Address: Ryrie Street, Geelong VIC 3220

PO Box 281, Geelong VIC 3220

Ph: (03) 4215 0000 (Geelong Hospital Switchboard)

Website: www.barwonhealth.org.au

Medical Workforce Unit Manager: Mr Wayne Harding

Chief Medical Officer: Associate Professor Alastair Mah

Supervisor/Director of Intern Training: Dr Christine Sommerville

Director, Medical Education & Training: Dr Rod Fawcett

General Information

Accommodation

Excellent housing is readily available within Geelong city and surrounding suburbs and only twenty minutes away, along the Surf Coast and the Bellarine Peninsula.

Conditions of Employment

Conditions are in accordance with the Victorian Public Health Sector (AMA Victoria) - Doctors In Training (Single Interest Employers) Enterprise Agreement 2013 and the Barwon Health Employee Code of Conduct.

Facilities and Amenities

Great Lifestyle...Geelong and Barwon Region today offers an exceptional lifestyle - first class shopping facilities, cosmopolitan waterfronts, breathtaking coastlines and rich and vibrant communities. All this, and it is still within easy reach of Melbourne. Geelong is situated on Corio Bay some 70 kilometres from Melbourne by freeway and the district includes some of the best surfing beaches in Australia, as well as many other recreational and sporting facilities.

Postgraduate Medical Education

For Intern Training

Interns have an orientation period of four days prior to commencement of the Intern year. Additionally there is a one hour tutorial at lunchtime on Mondays and Wednesdays.

For Intern, HMO and Registrar Training

There are postgraduate grand rounds, clinical meetings, lunchtime tutorials and a FRACP trainee lecture series. A fortnightly newsletter is published listing the postgraduate activities.

Postgraduate Training Positions are available in Anaesthetics, Cardiology, Diabetes and Endocrinology, Emergency Medicine, ENT Surgery, Gastroenterology, General Medicine, General Surgery, Geriatrics, Infectious Diseases, Medical Oncology, Nephrology, Neurology, Obstetrics & Gynaecology, Diploma of Obstetrics, Orthopaedics, Palliative Medicine, Pain Medicine, Pathology, Psychiatry, Plastic Surgery, Radiation Oncology, Rehabilitation Medicine, Respiratory Medicine, Urology, and Vascular Surgery.

Rotation Hospitals

- Alice Springs
- Darwin
- South West Healthcare (Warrnambool Campus)
- Hamilton Base Hospital
- Colac Hospital
- Ballarat Hospital
- St John of God (Geelong/Warrnambool)
- Forensic Care

GP Rural Generalist Pathway

The concept is to develop a pathway visible to those who are still within the clinical training years at Medical School, especially those associated with Deakin University, taking them through the prevocational years (Intern and Postgraduate Year 2) into a choice of targeted skills training in their third or subsequent postgraduate years on their path to specific training within the general practice environment in the Barwon South West Region or other areas covered by Southern GP Training.

Targeted skills training in the third or subsequent postgraduate year would be in the fields of Obstetrics (Advanced Diploma), JCCC Anaesthetics, Critical Care (ICU and or Emergency Medicine), Surgery or Community Paediatrics. The pathway involves 5 years of training 3 years with Barwon Health and two years with Southern GP Training.

Successful applicants for this pathway must exhibit a genuine interest in undertaking a career in rural general practice, preferably within the Barwon South West Region of Victoria. Applicants who have undertaken their medical training at Deakin Medical School or one of the other Victorian Medical Rural Clinical Schools are prefered.

All successful applicants will be expected to already be part of the Australian GP Training or apply for GP training via AGPT with Southern GP Training, during their intern or subsequent postgraduate years.

Bendigo Health

Affiliated with the University of Melbourne and Monash University

About Bendigo Health

The Bendigo Hospital Campus is the major acute referral Hospital for the Loddon Mallee Region of Victoria.

It is affiliated with The University of Melbourne through Austin and Repatriation General Clinical School and with Monash University, primarily through Bendigo Regional Clinical School including the provision of Primary Care Medical Services. The Monash Rural Clinical School commenced its first student intake in 2004.

The Victorian Government have committed to building a new hospital for Bendigo, which will be the largest regional hospital development in Victoria's history and one of the largest hospital projects across Australia. It will have the capacity to meet projected growth for health services in Bendigo and the greater Loddon Mallee region. The new hospital is expected to be completed in 2016.

Contact Details

Address: 62 Lucan Street, Bendigo, VIC 3550

PO Box 126, Bendigo, VIC 3550

- Aged Care and Residential

General Information

Accommodation

Single and double bedroom fully furnished modern units and hospital houses are available at subsidised rates.

Conditions of Employment

Hours of duty and salary are in accordance with the Victorian Public Health Sector (AMA Victoria) Doctors in Training (Single Interest Employers) Enterprise Agreement 2013.

Facilities and Amenities

Bendigo is a vibrant contemporary provincial city, boasting beautiful streets created from one of the world's greatest gold rushes. The nearby towns of Heathcote and Castlemaine have not missed the beat with artisans of food, wine and art flocking to be part of the action. Bendigo has a rich history based in the Gold Rush Era with a Chinese Heritage. The city of Bendigo has exceptional architectural heritage, mixing old with new.

Bendigo is within easy reach of the Murray River Tourist Region, Lake Eppalock, and the booming Central Victorian wine industry.

Bendigo and the adjoining region have a population of approximately 105,563 people and is in close proximity to Melbourne; only a 90 minute drive along the Calder Freeway. Bendigo's location on the northern fringe of the Great Dividing Range means it enjoys a warm Mediterranean climate. The region avoids extremes in weather such as snow and strong winds and averages 240 rain free days per year.

With the average January temperature of 29 degrees and 12 degrees in July – the variation between the seasons is very pleasant. Bendigo is still one of the few places in Australia that you can enjoy all four seasons

A large number of sporting, recreational and cultural activities are available all year round.

Bendigo is an educational centre with high standards in private and public schools as well as La Trobe University's Bendigo Campus.

Postgraduate Medical Education

An active Postgraduate Medical Education program operates with weekly meetings, individual unit meetings, journal clubs, clinical audits and clinical review. The Bendigo Division of the Monash Centre for Rural Health is conveniently located adjacent to the Hospital.

Allied Health Services

Speech Pathology, Physiotherapy, Occupational Therapy, Audiology, Dietetics, Diabetes Education and Social Work Services are provided on an inpatient and outpatient basis.

Medical Library

A modern library with current journals and text books is provided with the ability to conduct literature searches and include CD-ROM literature searches, Medline and Internet access. This facility is located at Monash Clinical School.

HMO Facilities

HMO Facilities include computer lab, 2 sleeping quarters with shared bathroom, kitchen area, lounge area with leather couches and wall-mounted flat screen TV

Goulburn Valley Health

Affiliated with the University of Melbourne

About Goulburn Valley Health

The Hospital is situated in the City of Shepparton and serves as the Base Hospital to a region including the Goulburn Valley and extending over the border into New South Wales (population approximately 160,000).

Goulburn Valley Health is a 280 bed acute and extended care facility. It has two smaller sites at Rushworth and Tatura with acute and aged care beds.

The University of Melbourne is affiliated with Goulburn Valley Health, and has established a **School of Rural Health** for medical and nursing undergraduates in purpose built facilities, located across the road from the main hospital.

Contact Details

Address: Graham Street, Shepparton VIC 3630

Ph: (03) 5832 2309 | **Fax:** (03) 5832 2394

Website: www.gvhealth.org.au

HMO Manager: Ms Amy Dainton

Supervisor/Director of Intern Training: Dr Carolyn Kamenjarin

Medical Education Officer: Ms Jerry Tumney

Services Available

The broad range of services include emergency, surgical, acute medical, paediatric, obstetrics and gynaecology, intensive care and psychiatry services as well as extended care and regional services. The Emergency Department has approximately 40,000 attendances per year.

Goulburn Valley Health provides community services that compliments its inpatient role, such as Hospital in the Home, diabetes education, continence and aged care assessment, home based nursing and allied health.

General Information

Conditions of Employment

As per Award.

Graduate Medical Education

Goulburn Valley Health has a Medical Education Officer who dedicates their time to implementing training programs for junior medical staff.

Goulburn Valley Health also has a Medical Clinical Educator and an assistant Medical Clinical Educator who both organize training and development programs for our International Medical Graduates.

Education programs are largely conducted in the newly finished Clinical Skills Laboratory located on campus.

For Intern and HMO Training

GV Health have a Director of Intern Training & Supervisor of PGY2 Training, a Medical Clinical Educator and Assistant Medical Clinical Educator. All ward work is supervised by Visiting and Salaried Medical Staff, with two formal ward rounds per week in major units.

Outpatient Clinics

HMOs take part in outpatient sessions in all clinical departments.

Operating Session

The surgeons are assisted by the Registrars and Interns for all public and most private cases, and interns receive expert training in basic surgical techniques.

All anaesthetics administered by Registrars, Interns & PGY2's are supervised by Visiting Medical Officers.

The Weekly Education Programme includes

- Clinical Review (Deaths and Complications) meeting.
- Unit ward conferences, X-ray review sessions and pathology review sessions.
- Tuesday Intern Education Program
- Tuesday IMG Clinical Skills Program
- Tuesday evenings IMG Education session
- Wednesday Grand Round
- Thursday Emergency Education Meetings
- Thursday PGY2 Program
- RACP Tutorial Teleconferencing
- Clinical Audit

Melbourne Health

The Royal Melbourne Hospital
Affiliated with the University of Melbourne

About Melbourne Health

The Royal Melbourne Hospital (RMH) is one of Melbourne's pre-eminent hospitals. For over 165 years, the hospital has touched millions of lives, improving clinical outcomes through outstanding clinical care, medical research and the training of future healthcare professionals. It provides specialist and general acute and sub-acute health services across two campuses. Primarily serving the north-western communities of Melbourne, the RMH also provides state-wide and specialist services to rural and regional Victorians.

RMH is part of Melbourne Health, which includes Northwestern Mental Health and the Victorian Infectious Diseases Reference Laboratory.

RMH – City Campus

Centrally located, RMH City Campus is a leading acute tertiary teaching, specialist and referral hospital with an international reputation for its commitment to clinical research, education and patient care. It offers a comprehensive range of general and specialist medical and surgical services including cardiac, diabetes neuroscience and oncology.

RMH – Royal Park Campus

The Royal Park Campus specialises in aged care, rehabilitation and ambulatory services. Advances in clinical practice, the changing health needs of an ageing population and community expectations are resulting in fewer and shorter hospital stays and a greater demand for care in the home. Consequently, an increasing emphasis at the Royal Park Campus will be placed on ambulatory care.

Manager, Medical Education: Ms Lynne Denby

General Information

Conditions of Employment

Appointments will be made under the terms and conditions of the Victorian Public Health Sector (AMA Victoria) - Doctors in Training (Single Interest Employers) Enterprise Agreement 2013.

Research & Education

RMH is a partner in Melbourne's internationally renowned Parkville Precinct, the hub of medical and biotechnology research, education and development, and medical services delivery in Victoria. The hospital has strong links with research facilities including the Walter & Eliza Hall Institute of Medical Research and the National Ageing Research Institute, and is a partner in Australia's largest brain research collaboration, the Melbourne Brain Centre. The hospital has a close affiliation with The University of Melbourne and works closely with other universities for undergraduate and postgraduate education of medical, nursing and allied health professionals.

RMH has a dedicated Medical Education Unit (MEU), located with our Clinical Skills Centre, and within our education precinct with the University of Melbourne Clinical School. The MEU provides day-to-day support for junior medical staff via our Director of Medical Education, Supervisor of Intern Training, Director of Clinical Training and Medical Education Officers. Education includes weekly intern sessions, as well as skills training and advanced life support training.

Monash Health

Casey Hospital, Dandenong Hospital & Monash Medical Centre
Affiliated with Monash University

About Monash Health

Monash Health provides comprehensive primary, secondary and tertiary health care services to people living in the south-eastern suburbs of metropolitan Melbourne from its five hospital sites: Monash Medical Centre (Clayton), Monash Medical Centre (Moorabbin), Dandenong Hospital, Casey Hospital (Berwick), and Kingston Centre; Cranbourne Integrated Care Centre and five community health sites. All services provided at these sites are linked to provide a "system of care" from community through acute care to rehabilitation and continuing care.

Monash Health provides health services for a primary catchment of more than 1 million residents and had over 2.44 million episodes of care across its various sites last year. There were over 9,000 births at Monash Health in 2013 and 39,000 surgical operations performed. In addition there were over 180,000 presentations at our three emergency departments. We have over 13,400 dedicated staff caring for our patients.

One outcome of the breadth and depth of our services is that it is possible to train in every single specialty at Monash Health. You will be able to interact with a range of specialities not offered at any other health service in the state.

Monash Medical Centre

(Clayton and Moorabbin) is one of the major tertiary referral centres in Victoria and provides a wide range of general and specialist care from 640 beds. Monash Medical Centre has, on site, the Monash University Departments of Medicine, Surgery, Anaesthesia, Paediatrics, Obstetrics & Gynaecology, Psychological Medicine, Developmental Psychiatry, Palliative Care and Community Medicine. In addition, the Institute of Reproduction and Development and Prince Henry's Institute of Medical Research are situated at Clayton forming part of the Monash Health Research Precinct. Major building works are occurring to further increase the scope of our paediatric services (Monash Children's).

Dandenong Hospital

(David Street, Dandenong) is a 520 bed acute general hospital which provides a full range of diagnostic, therapeutic and allied health services. Trauma, obstetrics and paediatrics feature prominently in the case load of the hospital.

Kingston Centre

(Warrigal Road, Cheltenham) is a 192 bed specialist Aged Care facility which provides programs in rehabilitation, geriatric medicine, aged mental health, residential care and respite care with a focus on restorative management. The Centre has an extended community outreach service comprising a Regional Aged Care Assessment Team, a Psychogeriatric Assessment and Treatment Team, three Community Rehabilitation Centres a domiciliary rehabilitation service and associated home and community care services. Located on-site are the Regional Continence Service, Pain Management Clinic, Geriatrician Consulting Clinic, Community Dental Clinic, Low Vision Clinic and a Cognitive, Dementia and Memory Service. There is also a Movement Disorders Clinic, which is complemented by the Geriatric Research Unit. Kingston Centre is recognised for two years of core training for advanced trainees towards FRACP. The Kingston Redevelopment includes: relocation of the Kingston Centre Nursing Home; refurbishment of rooms within the AG Eastwood Hostel; a new car park; a new Community Rehabilitation Centre; hydrotherapy pool; 64-bed sub-acute unit; essential services upgrades.

Casey Hospital, Berwick

This 243 bed hospital located in the city of Berwick provides the following services: medical & surgical inpatient care, same day services, ambulatory care services, special care nursery services, emergency services, palliative care, aged care, obstetrics, paediatrics, renal dialysis services, and community & inpatient mental health services.

Website: www.monashdoctors.org

Monash Doctors Workforce Contacts:

Manager, Monash Doctors: Denise Alister

Wellbeing Officer, Monash Doctors: Rosemary McKemmish

Team Leader, JMS Recruitment: Amy Zuscak

Supervisor / Director of Intern Training:

Medical Director, Monash Doctors Education: Dr Christina Johnson

Monash Medical Centre, Clayton: Dr Sally Ayoub

Dandenong Hospital: Dr Sheila Bryan

Casey Hospital: Dr Dean Everard

Moorabbin Hospital: Dr Shanon Jarvis

Kingston Centre: Dr Christina Johnson

General Information

- There is a close working relationship between the allied rural hospitals and Monash Health sites.
- There is a Director of Clinical Training at each Hospital site.
- College accredited posts for relevant Colleges and Training Programs.
- We encourage participation in the wider hospital structure including participating on Committees, undertaking research, mentoring and teaching students etc.
- Assistance/ support provided to attend courses for basic training.
- Flexible rostering to take into account career and personal needs.

Conditions of Employment

The conditions of employment and salary rates will be as per the Victoria Public Health Sector (AMA Victoria) – Doctors In Training – (Single Interest Employers) Enterprise Agreement 2013.

Graduate Medical Education

In association with Monash University, the Speciality Programs participate in undergraduate and postgraduate education at all sites within Monash Health. There is ample opportunity for

bedside training on a one to one basis and formal teaching by Consultants and Visiting Medical Staff. A formal lecture and seminar program exists for all professional staff at all sites and hospital medical officers are encouraged to attend. In addition, mandatory weekly education sessions are held at each site for interns. All interns participate in an interactive 4 day orientation program prior to commencement and will attend a minimum of 3 sessions at our Simulation Centre during the year. There is a comprehensive HMO education program.

Facilities and Amenities

We have gyms, childcare, ample car parking, educational and research precincts, HMO lounges, access to library facilities and education based at each Hospital site.

Rotation Hospitals

- Monash Medical Centre, Clayton
- Monash Medical Centre, Moorabbin
- Dandenong Hospital
- Casey Hospital, Berwick
- Kingston Centre
- Latrobe Regional Hospital (Traralgon)
- Mildura Base Hospital (Ramsay Health)
- West Gippsland Healthcare Group (Warragul)
- Bass Coast Regional Hospital (Wonthaggi)

Note that interns do not rotate to Monash Medical Centre-Moorabbin.

Hospital Medical Officer

Interns, 2nd year HMOs and 3rd/4th year HMOs may rotate through any of the sites in Monash Health. Rotations to various sites including rural hospitals are part of some training programs, as required to meet College and hospital needs. General Practice training is popular within Monash Health as there are many RACGP accredited posts to choose from. Physician, Paediatric, General Practice and Surgery Training often commences in second year whilst many other training programs commence in third year or beyond.

Interns - 1st Year .....103 Posts (2015)

The Intern year currently consists of five terms with each roster including the core terms of Medicine, Surgery and Emergency and at least one country rotation (Latrobe Regional Hospital, West Gippsland Hospital, Mildura Hospital, Trafalgar Medical Centre).

Specialty rotations include Gastroenterology, Palliative Care, Rehabilitation, Orthopaedics, General Practice, Radiology, Dermatology, Infectious Disease, Rheumatology and Psychiatry.

HMO - 2nd Year ..... 108+ posts

HMO2 year is streamed into Medical, Surgical and General Streams.

HMO - 2nd Year GENERAL.....57+ Posts

HMO - 2nd Year MEDICAL (BPT1).....34 Posts

HMO - 2nd Year SURGICAL .....17 Posts

(these will satisfy Pre-SET requirements)

HMO - 3rd and above ..... 105 posts

The HMO 3rd year consists of five terms arranged into Medical, Surgical and General (incorporating accredited posts in paediatrics, O&G, surgery, medicine, psychiatry, emergency, anaesthetics and geriatrics) positions. The General posts include RACGP accredited posts, Diploma of Obstetrics (at Monash, Dandenong and Casey), emergency paediatrics, accredited Geriatric posts and rotations to affiliated rural hospitals. Also offering accredited training positions in Anaesthetics, Obstetrics (which rotate between MMC, Dandenong and Casey) and Paediatrics which are conjoint appointments with Royal Children's Hospital (details may be obtained from the Director, Paediatric Physician Training at MMC and are listed under the RCH entry with applications to be directed to RCH).

Registrar Posts..... 590+ posts

There are over 590 registrar posts across Monash Health as well as Registrars on rotation to Hospitals external to Monash Health. Monash Health offers training in all specialty areas.

- Physician Training
- Surgical Training
- Paediatric Training
- Obstetrics & Gynaecology Training
- Psychiatry Training
- Emergency Medicine Training
- Intensive Care Training
- Anaesthetic Training
- Diagnostic Imaging Training
- Pathology Training
- Rehabilitation Training
- Geriatric Medicine Training

Monash Health also has an extensive Fellowship program with Fellows from a broad range of specialities visiting for 6-12 months to gain further professional expertise.

Monash Health: HMO2 Applications

Applicants for HMO2 positions must also register with the PMCV Computer Matching Service before **29 July 2015**

Hospital applications open 01 June 2015

Hospital applications close on 31 July 2015

Peninsula Health

Frankston & Rosebud Hospitals, The Mornington Centre, Golf Links Road & Rosebud Rehabilitation Unit

About Peninsula Health

Peninsula Health is the Mornington Peninsula's public hospital and health care service – Frankston Hospital is located 45 minutes drive from the Melbourne CBD and is the gateway to the Mornington Peninsula.

Last financial year there were over 80,000 ED attendances (Frankston & Rosebud Hospitals combined). There are 330+ in-patient beds at Frankston Hospital and a further 70+ at Rosebud Hospital. Last financial year there were over 60,000 admitted patients in Acute Health. Ninety-seven percent of patients requiring admission are treated on the Peninsula.

The Health Service has a full range of acute medical and surgical services, including General Medicine, Medical Specialties, General Surgery, Surgical Specialties, Orthopaedics, Obstetrics and Gynaecology, Psychiatry, General Practice, Pathology and Emergency Medicine.

All services are supported by a theatre suite, Intensive Care Unit, Coronary Care Unit, Coronary Angiography and Pain Service. A new Frankston hospital Emergency Department opened in 2015 with 3 new in-patent wards co-located.

There are accredited Registrar positions in Pathology, Emergency Medicine, Intensive Care, Aged Care, O&G, Physician training, Palliative Care, Psychiatry, Paediatrics, Surgery and Rehabilitation.

Residents and Registrars appointed to Rehabilitation posts may be employed at Golf Links Road or Rosebud Hospital.

Royal Children's Hospital (RCH)

About Royal Children's Hospital

The Royal Children's Hospital is a specialist paediatric hospital and provides a full range of clinical services, tertiary care and health promotion and prevention programs for children and adolescents. The hospital is the major specialist paediatric hospital in Victoria, and also cares for children from Tasmania and southern New South Wales and other states around Australia and overseas.

In its role as a leading paediatric teaching centre, the hospital has affiliations with the University of Melbourne and La Trobe University and links with other universities in postgraduate studies.

The Royal Children's Hospital has a strong commitment to research. The Murdoch Children's Research Institute is based at the Royal Children's Hospital providing a bench to bedside process within our site.

Contact Details

Address: Flemington Road, Parkville VIC 3052

Ph: (03) 9345 6365 (Medical Workforce Unit Reception)

Website: www.rch.org.au/jms

HMO Coordinator: Ms Tracy Waller

Manager Medical Workforce Unit: Ms Abbey Gordon

Director of Paediatric Physician Education:

Dr Margot Nash / Dr Mike Starr

Medical Education Officers: Ms Helen Enright

Services Available

As the major paediatric hospital in Victoria, the Royal Children's Hospital provides clinical, academic and advocacy services for children and young people throughout the state. It is internationally recognised as a leading centre for research and education.

The Royal Children's Hospital and Monash Children's Health (MCH) conduct the paediatrics-training program in Victoria. JROMO doctors come to RCH for periods of 13-52 weeks in one year in positions as Junior Residents (JRMO's). Some are already in a vocational training program (GP, Surgery); others enter training programs during this period (some enter the Paediatrics training program), while others complete their term/year without having joined a training program.

General Information

Conditions of Employment

The current conditions of employment and salary rates are as per the Victorian Public Health Sector (AMA Victoria) - Doctors in Training - Enterprise Agreement.

Graduate Medical Education

Formal and informal opportunities for JRMO's (or more senior) doctors are provided to develop knowledge, skills and qualities that improve their capacity to practise good medicine for children and adolescents in a supervised primary, secondary or tertiary care environment.

Facilities and Amenities

Crèche, residents' quarters, access to Library and Education at each site. RCH owns two ski clubs, one at Mt. Hotham and one at Mt. Buller and also has corporate membership with the University of Melbourne gym and staff can access facilities at a discount.

Rotation Hospitals

JRMO's will work in a variety of units and specialties at RCH, Monash Children's Health (MCH), Sunshine and rural sites. Please see example roster on www.rch.org.au/jms.

Registrars and SRMOs rotate to Austin, Box Hill, Frankston, Geelong, Northern, Royal Women's, Sunshine, Mercy, and Monash Children's Health.

Hospital Medical Officers

Interns - 1st Year ..... 2 Posts

The Internship consists of five 10 week rotations.

Recruitment and appointment of interns is via St Vincent's Hospital

JRMO posts.....52 posts (2015)

Junior Resident Medical Officers: These are twelve month positions. There will be three streams of JRMO positions in 2016:

General Paediatrics

General Practice

Surgery

More information is available on the RCH website.

Senior Resident Posts.....38 Posts

Recruitment of these positions is handled by the Monash Health.

Registrar Posts.....60 posts

These positions are available to medical practitioners with a minimum of 24 months paediatric experience (including 6 months of neonatology) who wish to continue Paediatric Physician Training with the RACP. A combined training program with RCH/MMC is offered with combined rosters. A number of rosters include rotations to other metropolitan and state hospitals including Geelong, Northern, Box Hill, Sunshine, Austin, RWH, MMC, Mercy and Frankston Hospitals. Job-sharing and job-splitting positions are available and are allocated on merit.

For more information, please visit our website www.rch.org.au/jms

South West Healthcare

Warrnambool Campus

About South West Healthcare

South West Healthcare is an accredited regional referral centre, servicing approximately 110,000 people in the South West area of Victoria. It is a fully integrated facility with 174 beds. Wards include medicine, surgery, obstetrics and gynaecology, six bed critical care unit, dialysis, emergency, inpatient psychiatry, GEM and rehabilitation. There are three fully equipped operating theatres and a separate endoscopy suite.

South West Healthcare has approximately 15,000 admissions and 25,000 emergency department attendances per year.

Contact Details

Address: Ryot Street, Warrnambool VIC 3280

Ph: (03) 5563 1666 (switchboard)

Ph: (03) 5563 1627

Website: www.southwesthealthcare.com.au

HMO Manager: Mr Peter Martin

Director of Medical Services: Dr Peter O'Brien

Supervisor/Director of Intern Training: Dr Brendan Condon

Medical Education Officer: Mr Peter Martin

Services Available

General Medical; Surgical; Critical care Unit; Emergency Department (15 beds); Psychiatry (15 beds); Special Care Nursery; Obstetrics & Gynaecology (700 births per annum); Orthopaedic surgery; Paediatrics, GEM, Rehabilitation, Palliative Care and inpatient and community based Psychiatry. A full range of Allied Health, Radiology, Pathology, and Community Health services are also available on site.

General Information

Accommodation & Travel

Fully furnished one and two bedroom flats are provided only for doctors on secondment from other hospitals. All accommodation is situated within walking distance to the hospital. South West Healthcare twelve month appointments need to locate their own accommodation.

Conditions of Employment

Hours of duty and salary are in accordance with the Victorian – Doctors in Training- Multi Enterprise Agreement.

Intern and HMO Training

All Consultants, Resident Specialists and Visiting Medical Staff take a great interest in graduate education. Clinical teaching is supported by a well resourced library and an active quality assurance and education program. Lunchtime educational meetings are held 2-3 times per week (ED Tutorials; Radiology rounds; lectures/evidence based medicine presentations).

Deakin Medical School is located on site and there is access to clinical simulation facilities.

Medical Library

Whether virtual or personal contact is needed, the Library can help you to source information technology, or study and research requirements. The library provides some after hour's access and includes updated books and journals affiliated with inter-library loans, along with easy internet access.

Facilities and Amenities

Warrnambool is a pleasant seaside holiday resort 264 kms west of Melbourne with a population of 33,000. There are three times daily rail services and excellent shopping centres, good schools of all grades from kindergarten to University and churches of all denominations. There is a wide range of indoor and outdoor sporting facilities available. An excellent art gallery and Performing Arts Centre are located within the central business district. The city is the base for a large tourist industry (Great Ocean Road, Shipwreck Coast, Whale Watching, Tower Hill).

Rotation Hospital

St. Vincent's and Barwon health supply Interns, HMOs and Registrars to South West Healthcare on rotation. South West Healthcare also appoints ten Interns independently.

Hospital Medical Officer

Interns (PGY1).....10 Posts

South West Healthcare offers 10 full year posts employed directly by South West Healthcare, as well as 6 posts on rotation from St. Vincent's and Barwon Health. Interns rotate through terms in Medicine, Surgery, Emergency, Psychiatry and GEM.

HMO .....10 Posts

South West Healthcare currently employs ten HMO's rotating through Emergency, Paediatrics, Hamilton ED/Medicine and Portland Medicine, Rehabilitation and Surgery.

There are also nine HMOs on rotation from St. Vincent's rotating through Medicine, Orthopaedics & Emergency.

St Vincent's Health (Melbourne)

St Vincent's Hospital & Caritas Christi Hospice
Affiliated with the University of Melbourne

About St Vincent's Health

St. Vincent's Hospital, under the auspice of the Sisters of Charity, employs over 300 medical staff in junior training positions in a wide range of specialty areas, and boasts an outstanding position in Australia with regard to success rates in both the physician, surgical and subspecialty examinations. Our modern Inpatient (400 bed) and Outpatient facilities support an outstanding patient care model, and our high tech Clinical Education and Simulation Centre support an optimum learning environment for residents.

Affiliated with the University of Melbourne, St. Vincent's Hospital has Professorial Chairs in Medicine and Surgery, Dermatology, Pathology, Neurosciences and Drug & Alcohol Studies. There is an associated Institute of Medical Research and Microsurgery Research Unit. St. Vincent's also provides a community based adult psychiatric service in the Inner Urban and Eastern Section of Melbourne.

Contact Details

Address: 41 Victoria Parade, Fitzroy VIC 3065

Ph: (03) 9231 2211 (St Vincent's Hospital Switchboard)

Ph: (03) 9231 2960/3304 (Medical Workforce Unit)

Fax: (03) 9231 3324 (Medical Workforce Unit)

Website: www.svha.org.au

Deputy Chief Medical Officer: A/Prof Andrew MacIsaac

Medical Workforce Unit Advisor: Ms Que Lagoutaris

Supervisor of Prevocational Training: Dr Neil Cunningham

Supervisor of SET Training: Mr Michael Johnson

Supervisor of HMO's Surgical: Mr Dhan Thiruchelvam

Director Clinical Education & Simulation: Mr Julian van Dijk

General Information

Conditions of Employment

Hours of duty and salary are in accordance with the Victorian Public Health Sector (AMA Victoria) - Doctors in Training (Single Interest Exployers) Enterprise Agreement 2013.

Facilities and Amenities

- Modern Inpatient facility, with up to the minute electronic resources including online X-ray viewing
- Clinical Education and Simulation Centre and well resourced Medical Education Unit
- Sophisticated Medical Library open Monday to Friday 8.45am – 7.00pm, Saturday 10am-5pm
- Gymnasium staffed by professional trainer, 24 hour access, reduced staff rates
- Newly refurbished large Residents Quarters
- Child Care Facility 50 full time places
- Bistro extended hours, open 7 days

Postgraduate Medical Education

Education Staff

St Vincent's Hospital has a highly developed Medical Education Unit to facilitate the education of all its medical personnel. The Director of Clinical Education and Simulation and the Medical Education Officer (MEO) support the continuing education of the HMO1 and HMO2 staff. The Hospital's Postgraduate Medical Education Committee oversees the activities of the MEO and the supervisors of Intern, physician and surgical training.

A comprehensive three-day orientation program is provided for all new Interns. This is supported by a weekly seminar series specifically designed to support Interns throughout the year. An orientation morning is provided for all HMOs new to the Health Service.

Education Programs

Regular seminars, journal club and audit programs are conducted by senior medical staff. Learning objectives and orientation packages for each HMO1 and HMO2 rotation have been developed. There is a HMO website which communicates education activities and RMO society functions. A comprehensive online learning program is available providing self-directed learning opportunities for residents. The state-of-the-art Education Centre with impressive surgical skills laboratory and high fidelity patient simulator affords HMOs the opportunity to practise management of crisis situations, in a safe and supervised learning environment. Advanced Life Support training is provided annually for all Interns and Residents, and for Interns commencing on a rural rotation a practical 'Paediatric Advanced Life Support' program is available prior to departure. A new 'Surgical Essentials for Residents' program provides practical surgical training to HMO2-3's. Well-structured physician, surgical and subspecialty training programs are in place with outstanding success rates in the fellowship exams including the highest pass rates in Australia over the last 15 years (90-100% St Vincent's pass rate well above 55-60% Australian average).

Support

A supervisor of Prevocational Training is available for all Interns & HMOs for confidential support. St Vincent's has a dedicated Surgical Mentor program designed to assist Interns and Residents interested in a surgical career. Considerable support is provided to HMO staff on secondment from the hospital.

An annual Career's Night facilitates choices in vocational training and assists Interns and Residents in career choices.

Western Health

Sunshine Hospital, Western Hospital & Williamstown Hospital
Affiliated with The University of Melbourne

About Western Health

Western Health is continuing its commitment to Melbourne's western suburbs by making long-term capital plans for the future growth. The West requires approaches to health care that are visionary, ambitious and enduring. These investments strengthen our ability to care for our growing communities and make important contributions to our social fabric.

Western Health has seen the inclusion of a Tertiary Centre co-located at the Sunshine Campus with a clinical school and a research centre. The state-of-the-art teaching, training and research centre has and will transform Sunshine Hospital into a major provider of education and training opportunities for current and future health care professionals. This Centre will play a pivotal role in researching diseases that affect our local communities, positioning Western Health as an area of excellence in academic and research fields.

2011 saw the opening of the Sunshine Hospital Radiation Therapy Centre in St Albans – this centre will enable around 900 people a year from Melbourne's Western Suburbs to receive their cancer treatment closer to home. This centre, a partnership between Western Health and Peter MacCallum Cancer Centre, provides, for the very first time, public radiation therapy services to the people of Melbourne's western suburbs. The radiation planning system and two linear accelerators will deliver treatment to patients with a range of cancers including those most commonly diagnosed in the western region; breast, bowel, prostate and lung.

Western Health has undertaken a major realignment of its services at Sunshine Hospital and Footscray Hospital. We have created a much needed critical care service at Sunshine Hospital, which will allow us to provide a greater level of care to the community in the Western Region. Footscray will maintain its role as a significant acute hospital, with ICU and coronary care services.

The new ICU and Cardiac Services at Sunshine Hospital were officially opened on 11 March and our relocation of services were for around 1-2 weeks prior to allow for a settling in period as everyone became familiar with the new settings and different arrangements. The relocation of our services will ensure that Western Health is providing the best possible mix of services for our patients, and in the best possible environment. Patient care and patient service will be improved, and the need to transfer patients between hospitals will be reduced.

We will continue to deliver the highest standard of health care - now in a more modern surrounding and more appropriate for our patients.

Western Health is a large organisation consisting of approximately 6,500 staff who work each day to improve the overall health of people across Melbourne's West, Western Health is a busy Healthcare Network located in one of the fastest growing, and most ethnically diverse regions in Australia. To service the growing population's needs the network employs around 260 Consultants and around 450 Junior Medical Staff in a complete range of specialities covering children, adults and the elderly.

We offer a wide range of services to care for our region at our public hospitals, which include Footscray Hospital, Sunshine Hospital and Williamstown Hospital. This Health Service also offers the Migrant Screening Service for the city of Melbourne, a Drug and Alcohol Program is offered at our DASWest Service and the Sunbury Day Hospital which provides medical and surgical procedures, including renal dialysis, chemotherapy, same-day procedures and specialist clinics.

Our catchment area, extends from Footscray and out to the growth corridors of Caroline Springs, Melton, Sunbury, Werribee and beyond. Our community has now reached approximately 800,000 (3% higher than previous population projections) within our primary and secondary catchments, and is among the fastest growth corridors in Australia. We cover a total catchment area of 1,569 square kilometres and we have a diverse social economic status - Western health is one of the most culturally diverse communities in Victoria with 38% speaking a language other than English at home in more than 100 different languages/ dialects.

Footscray Hospital

Is an acute teaching hospital with approx. 360 beds. It provides the majority of acute elective and acute emergency services for Western health; patients are provided with a range of inpatient and outpatient services including acute general medicine and surgical, intensive and coronary care, sub-specialty medicine, surgical services, and related clinical support. Research covering a range of medical, surgical and specialty areas is also conducted at the Hospital. Western Health maintains strong partnerships with a number of lead universities including the University of Mebourne, La Trobe, Monash, RMIT and Victoria Universities for medical, nursing and midwifery and allied health training.

Sunshine Hospital

Is a teaching hospital in Melbourne's outer-West with approximately 426 beds. Sunshine Hosptial has a range of services including women's and children's services, surgical, medical, mental health, aged care and rehabilitation services. Sunshine Hospital's emergency department, including a paediatric service, is one of the busiest general emergency departments in Victoria. Maternity services at Sunshine Hospital have the third highest number of births of any hospital site in the state. It continues to grow to meet the increasing demand with the community.

The Williamstown Hospital

Is a 90-bed facility providing emergency services, surgical services, rehabilitation and geriatric evaluation and management services, renal dialysis services and community rehabilitation and transition care services.

General Information

Conditions of Employment

Employees are bound by the organisation's Regulations and Policies as may apply. Hospital Medical Officers are covered by the Victoria Public Health Sector (AMA Victoria) – Doctors in Training – (Single Interest Employers) Enterprise Agreement 2013.

It is also a condition of employment that you may be rostered to a rotation at other campuses within the Health Service or other health services as directed.

Facilities and Amenities

Please refer to our website www.westernhealth.org.au for more information.

Postgraduate Medical Education

Western Health is proud of the range of training opportunities it provides. The variety of education and training opportunities for junior medical staff include:

- Weekly intern and HMO education sessions
- Grand rounds
- Audits
- Unit-based ward teaching and presentations
- Tutorial programs for speciality training
- Advanced life support training
- Weekly Professorial Reports
- Video conferencing of education sessions between sites

A five day paid orientation program is compulsory for all interns prior to commencement.

Western Health has an extensive range of clinical services and is committed to undergraduate and postgraduate teaching and research. Training of interns, HMOs and Registrars is supported by the Medical Education Officer, the Director of Postgraduate Medical Education, the Directors of specialty training and the Junior Staff Training Committee. Weekly education programs exist for interns, HMOs and registrars. Journal clubs, grand-rounds, audits and physician training programs are also established.

Western Health is accredited for Basic Physician, Basic Surgical and General Practice Training. HMO 2nd year and above may rotate to all three campuses plus selected rural campuses.

- Peri-Operative & Pain Management
- Radiology

All interns will be allocated core terms in Medicine, Surgery and Emergency and at least one rural rotation.

HMO - 2nd Year ..... 63 posts (2016)

Rotations include:

Western Health offers training in Medicine, Surgery, Emergency, Critical Care & General Practice with rotations that are accredited by FRACP, FRACS, FRACEM and FRACGP.

Positions offered include a wide range of medical and surgical subspecialties across the 3 campuses.

Rotations are available in, intensive care, emergency medicine & anaesthetics.

Positions suitable for those wishing to pursue general practice or considering specialising in fields such as Paediatrics, Psychiatry & Obstetrics & Gynaecology are also available. In determining the allocation of rotations, previous experience and the future career direction of the applicant is considered.

Western Health has an extensive range of clinical services and is committed to undergraduate and postgraduate teaching and research. Training of interns, HMOs and Registrars is supported by the Medical Education Officer, the Director of Postgraduate Medical Education, the Directors of specialty training and the Junior Staff Training Committee. Weekly education programs exist for interns, HMOs and registrars. Journal clubs, grand-rounds, audits and physician training programs are also established.

Western Health is accredited for Basic Physician, Basic Surgical and General Practice Training. HMO 2nd year and above may rotate to all three campuses plus selected rural campuses.
