

COMMUNIQUE

Monitoring Completion of Prevocational Outcome Statements for Prevocational Doctors (PGY1 and PGY2)

The Australian Medical Councils (AMCs) revised National Framework for Prevocational Medical Training (National Framework) introduces prevocational outcome statements, which describe the broad and significant capabilities that prevocational doctors should achieve by the end of PGY1 and PGY2.

The Postgraduate Medical Council of Victoria (PMCV) has identified that without the availability of the National ePortfolio, it may be difficult for some health services to manually monitor the completion of prevocational outcomes statements for each prevocational doctor.

PMCV's National Framework Steering Committee has endorsed that in the state of Victoria, ***Medical Education Units are not required to manually monitor the completion of prevocational outcome statements until the National ePortfolio is available.***
